

KAISER PEPTIDES SKINCARE SERUM

EXPLANATION OF INGREDIENTS

Butylene Glycol is a liquid ingredient used in skincare and makeup. It helps keep products smooth, hold moisture in your skin, and mix other ingredients together. It's safe and gentle, kind of like a moisturizer helper that also makes products feel nice on your skin.

Ascorbic Acid is just another name for **vitamin C**. It's an antioxidant that helps protect your skin from damage, brightens dark spots, and supports collagen (which keeps skin firm and smooth).

3-o-Ethyl Ascorbic Acid is a **stable form of vitamin C** used in skincare. It works to **brighten skin, fade dark spots, and boost collagen**, but it doesn't break down as easily as regular vitamin C — so it stays effective longer in products.

Glycerin is a **moisture magnet** — it pulls water into your skin to keep it soft, smooth, and hydrated. It's clear, gentle, and found in most lotions and skincare products.

Peg/Ppg-17/6 Copolymer is an ingredient that helps **blend oil and water** in products so they stay smooth and mixed. It also makes skincare or makeup **feel silky and spread easily** on your skin.

Peg/Ppg-14/7 Dimethyl Ether is an ingredient that makes products **feel light and smooth** on your skin. It helps them **spread easily, absorb quickly**, and can also **lock in moisture** without feeling greasy.

Niacinamide is a form of **vitamin B3** that helps **brighten skin, shrink pores, smooth texture**, and **calm redness**. It's great for making your skin look **clear, even, and healthy**.

Ferulic Acid is an **antioxidant** that helps **protect your skin from sun damage and pollution**. It also **boosts the power of vitamins C and E**, making them work better and last longer.

Panthenol is a form of **vitamin B5** that helps **soothe, hydrate, and heal** the skin. It makes your skin feel **soft, smooth, and calm**, especially if it's dry or irritated.

Ammonium Polyacryloyldimethyl Taurate - is an ingredient that helps **thicken and stabilize** skincare products. It gives creams and gels their **smooth, silky texture** and keeps everything **mixed evenly** so the formula doesn't separate.

Acetyl Hexapeptide-8 is a **peptide** that helps **relax facial muscles** to reduce the look of **fine lines and wrinkles** — kind of like a **gentle, topical version of Botox** in skincare.

Triethanolamine helps **balance the pH** of skincare products and **mix oil and water** so the formula stays smooth and even. It's basically a **helper ingredient** that keeps products stable and working right.

Sorbitol is a **sugar-based moisturizer** that helps **pull water into the skin**, keeping it **soft, smooth, and hydrated**. It also helps products **stay fresh and creamy**.

Phenoxyethanol is a **preservative** that keeps skincare products **fresh and free from bacteria or mold**. It helps make sure your products **stay safe and last longer**.

Sodium benzoate is a **preservative** that helps **stop bacteria, mold, and yeast** from growing in products, keeping them **safe and lasting longer**.

PPG-26-Buteth-26 helps **mix oil and water** in products and makes them **spread smoothly** on your skin. It also helps other ingredients **blend evenly** so the formula feels light and silky.

PEG-40 Hydrogenated Castor Oil helps **mix oil and water** in skincare or makeup so everything **stays blended and smooth**. It also makes products **feel soft and spread easily** on your skin.

KAISER PEPTIDES SKINCARE SERUM

EXPLANATION OF INGREDIENTS

Sodium hydroxide is an ingredient that helps **control the pH** of skincare products — basically, it keeps them **from being too acidic or too harsh** so they're safe for your skin.

Hexapeptide-9 is a **peptide** that helps **repair skin and reduce wrinkles** by boosting **collagen and firmness**, making skin look **smoother and more youthful**.

Lactobacillus/Soymilk Ferment Filtrate is a **probiotic-rich ingredient** made from **fermented soy milk**. It helps **nourish, smooth, and strengthen** your skin while supporting a **healthy skin barrier**.

Bis-PEG-18 Methyl Ether Dimethyl Silane is an ingredient that makes products feel **silky, smooth, and lightweight**. It helps **lock in moisture** and gives skin a **soft, non-greasy finish**.

Pentylene glycol is a **moisturizing ingredient** that helps **keep skin soft and smooth**. It also helps **preserve products** by stopping bacteria from growing and makes other ingredients **work better and spread easily**.

Glucose is a **natural sugar** that helps **hydrate and nourish** your skin. It also supports your skin's **energy and moisture balance**, keeping it **soft, smooth, and healthy-looking**.

Tocopherol is **vitamin E** — an **antioxidant** that helps **protect your skin from damage, lock in moisture**, and keep it looking **smooth and healthy**.

Sodium pea (from **pea protein**) helps **firm, smooth, and strengthen** the skin. It gives a **tightening effect** and helps skin **look more toned and healthy**.

Hydrolyzed Sodium Hyaluronate is a **smaller form of hyaluronic acid** that goes **deeper into the skin** to **hydrate, plump, and smooth** fine lines. It helps your skin stay **soft, full, and moisturized**.

Hyaluronic acid is a **hydration booster** that can hold a ton of water — it helps your skin stay **plump, smooth, and moisturized** by **locking in moisture**.

Caprylyl glycol is a **moisturizing ingredient** that helps **keep skin soft and smooth**. It also works as a **natural preservative booster**, helping products **stay fresh longer**.
